

PROLAPSE SURGERIES

Mothers with A Heart For Ethiopia supports a wonderful program that provides surgeries for women who suffer with UVP, utero-vaginal prolapse. This is a relatively simple condition to treat with surgery but the cost of \$325 is beyond the means of so many women in Ethiopia. Thanks to the generosity of our donors, we are able to sponsor these surgeries and change the lives of these women.

Dr. Mark Karnes, Dr. Nate Ross and their obstetrics team provide excellent medical care at Soddo Christian Hospital. This surgery allows the women to have their dignity restored while also giving them the ability to return to their regular lives without pain. This is truly a miracle for these women and MWAHFE is proud to be a part of it.

Mothers with a  for Ethiopia

has made a donation to DevXchange International in honour of you!

This donation will help to fund prolapse surgeries in Ethiopia.

Mothers With a Heart for Ethiopia is an organization that funds seven Devxchange projects focusing on empowering women, supporting children and promoting education in Ethiopia.
